

Project Profile

Memorial Baptist Church

Design-Build
Development
General
Contracting

Project Specifications:

- ◆ Located in Columbia, Missouri on Paris Road
- ◆ 21,000 Square Foot Addition to Existing Church
- ◆ Built a facility to promote more community involvement
- ◆ Project Completed in 2000

This addition included a new sanctuary, educational classrooms, recreational facilities, child care rooms, kitchen and a spacious reception area. The original sanctuary was converted into the music and theatre room.

The design of this facility called for an innovative approach to integrating the many needs of the congregation into one truly multi-purpose facility. This was achieved by our on-staff architects and engineers working in cooperation with the building committee as a team to accurately assess their needs and provide for it in the building plans.
