Neosho Office Building

Project Specifications:

- ◆ Originally built in 1898
- ◆ 30,000 Square Feet
- ◆ Located in downtown Neosho Missouri.
- ◆ Project Completed in 2003

This 30,000 square foot historic building built in 1898 was renovated into class "A" office space. The adaptive reuse and renovation took much care to restore the ornamental sheet metal work and masonry exterior. Walnut shells were used to blast clean the huge interior wood columns and beams used to support the floors. Much attention to detail was needed to paint portions of the exterior to bring out the beautiful ornamental metal and wood artwork. The building provides unique office space to its tenants.
